Appl. No. 10/674,670 Atty. Docket No. CM2701Q Reply dated October 24, 2007 Reply to Final Action of September 19, 2007 Customer No. 27752 RECEIVED CENTRAL FAX CENTER OCT 2 4 2007

LISTING OF CLAIMS

- (Currently amended) An absorbent article comprising a substantially liquid pervious topsheet, a substantially liquid impervious backsheet and an absorbent core between said topsheet and said backsheet, wherein said topsheet absorbent article comprises a nonwoven fabric, wherein said nonwoven fabric
 - a) comprises a plurality of fibers;
 - b) has a surface tension of at least 65 mN/m when being wetted with saline solution;
 - c) has a liquid strike through time of less than 5 s for a fifth gush of liquid; and
 - d) comprises polymers comprising hydrophilic monomer molecules, a reaction product of a radical polymerization initiator molecules chemically grafted to the surface of at least a part of said plurality of fibers comprised by said nonwoven fabric, and agent molecules, wherein the amount of radical polymerization initiator molecules is less than 2 wt% of the monomer molecules and at least three times the amount of the agent molecules.
- (Currently amended) An Aabsorbent article according to claim 1, wherein said nonwoven
 fabric comprises at least a first plurality of fibers and a second plurality of fibers, wherein
 said first plurality of fibers is different from said second plurality of fibers.
- 3. (Currently amended) An Aabsorbent article according to claim 2, wherein only said first plurality of fibers has hydrophilic polymers grafted to their surface.
- 4. (Currently amended) An Aabsorbent article according to claim 1, wherein said strike through time after said first and said fifth gush of said nonwoven fabric does not decrease more than 5% after storage of said absorbent article for at least 10 weeks.
- (Currently amended) <u>An Aa</u>bsorbent article according to claim 1, wherein said polymerized hydrophilic monomer comprises a molecule comprising at least one unsaturated double bond.

5/11

Appl. No. 10/674,670 Atty. Docket No. CM2701Q Reply dated October 24, 2007 Reply to Final Action of September 19, 2007 Customer No. 27752

- (Currently amended) <u>An Aabsorbent article according to claim 5</u>, wherein said
 polymerized hydrophilic monomer comprises a molecule comprising a group which is
 able to react with an acid or base to form a salt.
- 7. (Currently amended) An Aabsorbent article according to claim 6, wherein said polymerized hydrophilic monomer comprises acrylic acid or its salt.
- 8. (Currently amended) An Aabsorbent article according to claim 1, wherein said polymers add at least on said first plurality of fibers from 0.3 wt% to 10 wt%.
- (Currently amended) An Aabsorbent article according to claim 8, wherein said polymers
 are added to said first and said second plurality of fibers in a weight percent range of 0.3
 wt% to 10 wt%.
- 10. (Canceled)
- 11. (Original) An absorbent article according to claim 1, wherein said absorbent core is provided with a core wrap material, which comprises said nonwoven fabric.
- 12. (Canceled)
- 13. (Canceled)
- 14. (Canceled)

Line 1

- 20. (Canceled)
- 21. (New) An absorbent article comprising a substantially liquid pervious topsheet, a substantially liquid impervious backsheet and an absorbent core between said topsheet and said backsheet, wherein said absorbent core is provided with a core wrap material, which comprises a nonwoven fabric, wherein said nonwoven fabric

513-634-5049

- a) comprises a plurality of fibers;
- b) has a surface tension of at least 65 mN/m when being wetted with saline solution;
- c) has a liquid strike through time of less than 5 s for a fifth gush of liquid; and
- d) comprises polymers comprising hydrophilic monomer molecules, a reaction product of a radical polymerization initiator molecules chemically grafted to the surface of at least a part of said plurality of fibers comprised by said nonwoven fabric, and agent molecules, wherein the amount of radical polymerization initiator molecules is less than 2 wt% of the monomer molecules and at least three times the amount of the agent molecules.
- 22. (New) An absorbent article according to claim 21, wherein said nonwoven fabric comprises at least a first plurality of fibers and a second plurality of fibers, wherein said first plurality of fibers is different from said second plurality of fibers.
- 23. (New) An absorbent article according to claim 22, wherein only said first plurality of fibers has hydrophilic polymers grafted to their surface.
- 24. (New) An absorbent article according to claim 21, wherein said strike through time after said first and said fifth gush of said nonwoven fabric does not decrease more than 5% after storage of said absorbent article for at least 10 weeks.
- 25. (New) An absorbent article according to claim 21, wherein said polymerized hydrophilic monomer comprises a molecule comprising at least one unsaturated double bond.

Appl. No. 10/674,670 Atty. Docket No. CM2701Q Reply dated October 24, 2007 Reply to Final Action of September 19, 2007 Customer No. 27752

- 26. (New) An absorbent article according to claim 25, wherein said polymerized hydrophilic monomer comprises a molecule comprising a group which is able to react with an acid or base to form a salt.
- 27. (New) An absorbent article according to claim 26, wherein said polymerized hydrophilic monomer comprises acrylic acid or its salt.
- 28. (New) An absorbent article according to claim 21, wherein said polymers add at least on said first plurality of fibers from 0.3 wt% to 10 wt%.
- 29. (New) An absorbent article according to claim 28, wherein said polymers are added to said first and said second plurality of fibers in a weight percent range of 0.3 wt% to 10 wt%.
